A Beautiful Border

Native **Rhododendrons** and **Azaleas** massed in a border create a most attractive and practical planting.

This group approaches perfection in shade or semi-shade and will produce flowers from early Spring until late July. The foliage of the two blend nicely and the shiny green leaves of the Rhododendron remain throughout the year, thus preventing the bareness which often appears in so many borders during the Winter months.

This type of planting, unlike so many others, does not grow out of proportion. Most of these plants are slow growing. They prosper and become more beautiful as they grow and age into an impenetrable mass of foliage and flower. Once planted they can remain without disturbance for a veritable lifetime of satisfaction to the property owner.

Use **Rhododendron catawbiense** and **Rhododendron maximum** interspersed with masses of **Azalea calendulacea**, **vaseyi**, **nudiflora**, and **arborescens**.

Write for Our Complete Catalog

HYBRID RHODODENDRONS

See illustration on reverse side of this folder.

These are the grafted named Rhododendrons which produce such gorgeous displays of color in June.

We have selected only varieties hardy in this section. Their foliage is somewhat better than native types, and they almost never fail to set bloom buds. We have the following varieties and sizes in considerable quantity:

Boule de Neige. A dwarf, compact variety bearing an abundance of large white flowers. Very hardy. Each
15 to 18 in. \$3.50
18 to 24 in. 5.50

Caractacus. Warm crimson, with faint tinge of purple throughout. Size: 2 to 2½ ft.

Charles Dickens. Rich deep scarlet. Sizes: 18 to 24 in. and 2 to 2½ ft.

Kettledrum. Rich crimson. Sizes: 18 to 24 in. and 2 to 2½ ft.

Lady Armstrong. A dainty, clear, light pink variety lightly spotted with green and black. Size: 2 to 2½ ft.

Mrs. C. S. Sargent. A hardy, deep rose pink of compact habit. Sizes: 18 to 24 in. and 2 to 2½ ft.

Old Port. Rich Plum color. Sizes: 15 to 18 in. **President Lincoln.** Lavender. Sizes: 18 to 24 in. and 2 to 2½ ft.

Roseum elegans. Good rose. An outstanding variety in habit and hardiness. Sizes: 18 to 24 in. and 2 to 2½ ft.

Prices of Named Hybrid Rhododendrons
Each
18 to 24 in. \$4.00
2 to 2½ ft. 5.50
2½ to 3 ft. 7.50

Mixed Hybrids. All budded plants with all the good colors. Each
12 to 15 in. \$1.75

ENKIANTHUS

Campanulatus (Redvein Enkianthus). Without artificial shaping will develop into a handsome, large shrub well clothed with clean foliage which turns brilliant red in Fall. Bunches of nodding flowers are borne on the whorled branches and these red-veined white cups are quite unlike any other flower.

See illustration on reverse side of this folder.
Each
3 to 4 ft. \$2.50
4 to 5 ft. 3.50

AZALEAS

Hardy Evergreen Azaleas combined with Rhododendrons and Mountain Laurel will extend the time of bloom of your border by several weeks.

Hinodegiri. Probably the best of the Evergreen Azaleas for color, foliage and form. A low, compact plant with handsome, waxy foliage which turns bronze in Winter. The flowers are clear fine red borne in great profusion in May. Splendid for facing Laurel and Rhododendron as mass planting. Each

8 to 10 in. \$1.00
10 to 12 in. 1.25
12 to 15 in. 1.75
15 to 18 in. 2.25
18 to 24 in. 3.50
2 to 2½ ft. 5.00

Kaempferi "Hybrids" (Half evergreen). Large, beautiful, fire red flowers. Being absolutely hardy, it is a fine variety for our climate. Grows tall and bushy. Each

15 to 18 in. \$1.75
18 to 24 in. 2.50
2 to 2½ ft. 4.00

Hedge of *Taxus Brevifolia* edging our nursery on the Saw Mill River Parkway

TAXUS (Yew)

The Yews are very desirable evergreens, densely clothed with dark green foliage. They thrive best in a moderately moist, sandy loam and endure shade well.

Baccata repandens. This dwarf, spreading form with its beautiful foliage and graceful, drooping branches is unique. Each

15 to 18 in. broad.....	\$2.00
18 to 24 in. broad.....	3.00

3 to 3½ ft. broad.....	8.00
3½ to 4 ft. broad.....	10.00

DWARF HEDGE YEW (*Taxus Canadensis Stricta*)

This dwarf, compact bush form is the only absolutely hardy substitute for Boxwood. Withstands clipping well and is an ideal pygmy edging plant for the perennial garden. Bears red berries and is hardy as far north as northern Vermont. Enjoy its luxurious foliage secure in the knowledge that it will not winterkill.

4 to 4½ ft.....	11.00
4½ to 5 ft.....	12.00
5 to 6 ft.....	17.50
6 to 7 ft.....	\$20.00 to 25.00

Stock unusually heavy. Large specimens. Special quotation on quantities for hedges.

Hatfield (New). Finest upright Yew. Holds its form almost without trimming. Each

18 to 24 in.....	\$3.50
2½ to 3 ft.....	5.00
3 to 4 ft.....	7.50

Hatfield Spreading. Foliage same as the above. The plant grows dense and compact, taking an almost globe shape. Each

18 to 24 in.....	\$3.50
2½ to 3 ft.....	7.50
3 to 3½ ft.....	9.00

Hicksi (Hicks Yew). Interesting form of this most useful family. Exceptionally dark green needles. Grows in an upright, columnar shape. Each

18 to 24 in.....	\$2.00
2 to 2½ ft.....	3.50
2½ to 3 ft.....	5.00
3 to 4 ft.....	6.50
4 to 4½ ft.....	9.00

Hunnewelliana (Hunnewell Yew). The ideal hedge Yew. Somewhat similar to Japanese Yew except for a more uniform, perfect vase shape. Very fine for foundation planting or low hedges.

15 to 18 in.....	\$2.50
18 to 24 in.....	3.50
2 to 2½ ft.....	6.00

HEATH

Heather is a famous plant in the history and folklore of almost all northern European people. In Europe it is one of the commonest weeds, covering hundreds of square miles of mountain and upland plains with a dense feathery, green growth, breaking into exquisite masses of flowers of the utmost delicacy. Here it is a rock garden plant to be treated with utmost respect. Heather likes sour soil, open sun and a fair share of moisture.

Our stock is all five-year-old plants, full and bushy and has been several times transplanted

SPECIAL INTRODUCTORY OFFER

MALUS (Flowering Crab)

The beauty of the Flowering Crab in Apple Blossom time is beyond any verbal description we could make in this space. A profusion of delicately fragrant flowers surround the irregular twigs for two to three weeks. In the Fall even the young plants are laden with attractive fruit which last throughout the Winter unless eaten by the birds. We list below the most attractive varieties of this group.

Floribunda. A single, rose pink variety bearing an abundance of fruit even when young.

See illustration on reverse of this folder.

3 to 4 ft..Ea.	\$1.50	5 to 6 ft..Ea.	\$3.50
4 to 5 ft..Ea.	2.50	6 to 8 ft..Ea.	5.00

Hopa. Erect, symmetrical, leaves tinged purple. Flowers large red, single; dark red fruit.

4 to 5 ft..Ea.	\$1.75	6 to 7 ft..Ea.	\$5.00
5 to 6 ft..Ea.	4.00		

Ioensis bechteli (Double Pink Crab). A very fine variety with double pink flowers resembling a miniature Rose. Makes a shapely, compact tree.

3 to 4 ft..Ea.	\$2.00	4 to 5 ft..Ea.	\$3.00
----------------	--------	----------------	--------

Sargenti. A dwarf variety, shrubby in habit. Sparkling white flowers and an abundance of small red fruit.

3 to 4 ft..Ea.	\$2.50	4 to 5 ft..Ea.	\$3.50
----------------	--------	----------------	--------

Theifera (Tea Crab). Irregular, spreading top with zig-zag branches completely clothed with flowers. Buds red, opening to single pink flowers. Fruits dull red.

3 to 4 ft..Ea.	\$1.75	4 to 5 ft..Ea.	\$2.50
----------------	--------	----------------	--------

ALTHAEA (Rose of Sharon)

A rather erect and tall-growing shrub of neat form. Blooms in late Summer, beginning in August and lasting usually until heavy frosts. Splendid plants in the following varieties:

A. anemonaeflorus. Semi-double; white, dark center.

A. Duchesse de Brabant. Double, red. One of the best.

A. Jeanne d'Arc. Double pure white.

A. Lady Stanley. Double, blush white with pink eye.

Above Althaeas: 2 to 3 ft. 50c. each,
3 to 4 ft. 75c. each

A. coelestis. Single, blue. An outstanding newer form of a delightful shade. 18 to 24 in. 50c. each, 2 to 3 ft. 75c., 3 to 4 ft. \$1.00. See illustration on reverse side of this folder.

CORNUS (Dogwood)

The splendor and character of the Dogwoods is indispensable in the garden. They are equally as useful as lawn specimens, for border emphasis, or for naturalizing. The flowers are followed by brilliant red berries, very attractive to birds. The individuality of this tree is as impressive when in leaf and when free of leaves as it is when in flower or berry.

Florida (White Dogwood). A native flowering tree attaining about 20 ft. in height at maturity and producing a wealth of single white flowers before the leaves appear. The foliage is deep green, turning a brilliant red in the Autumn.

3 to 4 ft..Ea. \$1.75	8 to 10 ft..Ea. \$9.00
4 to 5 ft..Ea. 2.75	10 to 12 ft..Ea. 12.00

6 to 7 ft..Ea. 6.00	Prices on re-
7 to 8 ft..Ea. 7.50	quest.

Florida rubra (Pink or Red Dogwood). Similar to our native White Dogwood in habit and form but with masses of pink flowers.

2 to 3 ft..Ea. \$1.75	5 to 6 ft..Ea. \$7.50
3 to 4 ft..Ea. 3.50	6 to 7 ft..Ea. 9.00
4 to 5 ft..Ea. 5.00	8 to 10 ft..Ea. 15.00

Kousa (Kousa Dogwood). White flowers borne after the leaves come out. Large, Strawberry-like crimson fruit.

7 to 8 ft.....Ea. \$6.00

TSUGA Canadensis

Notwithstanding the fact that Hemlock is our largest selling evergreen, we have been able to maintain a magnificent stock of this handsome ornamental tree.

Hemlocks can be used in many different ways: as lawn specimens they attain great size and beauty; by shearing they may be used in foundation planting and kept from overgrowing for years and years; for border or screen they form a most naturalistic background. Hemlocks thrive in shade or full sun and are practically immune to insects and diseases. Each 10

18 to 24 in.....	\$1.75	\$16.00

Apple Trees in the Landscape

The illustration above shows how the use of fruit trees can produce effective landscape pictures. These large trees planted in April, 1939, produced a sizable crop of fine fruit the same Fall. No other tree has more character and no other produces results more quickly. The Spring blossoms are equal to any flowering tree and the fruit is both ornamental and useful. Rosedale offers a complete stock of fruit trees and small fruits in larger than average sizes. Many Apple varieties produce fruit at six years and assume real character at eight or ten years. By planting Rosedale larger trees, results are obtained immediately. We invite your inquiries for large trees from bearing orchards or can supply several varieties in 3 to 4 year old transplanted trees from our nursery stock.

Prices, as in other stock, are as low as consistent with highest quality—2-year-old trees as low as 50c. and 1 to 1½ inch caliper trees at \$1.50 each. Large, 3- to 8-inch caliper trees priced on request including moving, planting and guarantee.

FRENCH HYBRID LILACS

Almost everybody knows and loves the old-fashioned purple Lilac, but only a few know how exquisitely lovely the French Hybrids are. They are just as easy to grow, and bloom when they are even younger. The flowers are relatively huge, and are borne in enormous clusters, sometimes six or seven clusters combined in one great truss. Here are eight favorite varieties which are so exquisitely lovely and different that you will want them all in the border as specimens.

Alphonse Lavalle. Double, blue. 2 to 3 ft., 3 to 4 ft., 4 to 5 ft.

Belle de Nancy. Double, satiny rose. 3 to 4 ft. See illustration on reverse of this folder.

Charles X. Single, bluish violet red. 2 to 3 ft., 3 to 4 ft.

Grace Orthwaite. Single, bright pink. 2 to 3 ft.

Hugo Koster. Single, soft lilac. 2 to 3 ft., 3 to 4 ft.

Souvenir de Ludwig Spaeth. Single bright red. 2 to 3 ft., 3 to 4 ft., 4 to 5 ft. See illustration on reverse side of this folder.

Marie Le Graye. Single white, fragrant. 2 to 3 ft.

Mme. Casimir Perier. Double white. 2 to 3 ft.

Mme. Lemoine. Double, snow white. 3 to 4 ft. See illustration on reverse side of this folder.

Pres. Carnot. Double, orchid. 2 to 3 ft., 3 to 4 ft., 4 to 5 ft.

Pres. Grevy. Double, soft blue. 2 to 3 ft., 3 to 4 ft., 4 to 5 ft. See illustration on reverse side of this folder.

In addition to the above we offer 14 other varieties in limited quantity.

Prices of Hybrid Lilacs

2 to 3 ft. \$1.50, 3 to 4 ft. \$2.25,
 4 to 5 ft. \$3.50

LARGE SPECIMEN LILACS

For the first time in many years we are able to offer a wide selection of heavy specimen plants. There are 28 varieties including all those preferred by landscape architects. The plants are broad and bushy with no sucker growth and full of vigorous buds. Sizes run from 5 feet to 8 feet and all will be dug with a generous ball of earth.

We offer these plants from \$5.00 to \$10.00 each, according to size and quantity.

Our Selection of Outstanding Shrubs

ILEX VERTICILLATA (Winterberry)
3 to 4 ft. \$1.00 each

ABELIA GRANDIFLORA
2 to 3 ft. \$1.50 each

MALUS FLORIBUNDA
4 to 5 ft. \$2.50 each
—It's fall fruit

AZALEA HINODEGIRI
8 to 10 in. \$1.00 each

HYDRANGEA PETIOLARIS
Large plants, 18 to 24 in. \$1.50 each

TREE WISTERIA
5 to 6 ft. high; 3 ft. spread
\$7.50 each; 2 for \$14.00.

ENKIANTHUS CAMPANULATUS

SPECIMEN TREE IN OUR NURSERY

ABIES DOUGLASI

(Douglas Fir)

It would be difficult to over-rate the beauty and practicability of this handsome tree. Its density and symmetry make it most desirable for ornamental use either for screening or as a specimen on the lawn apart from other planted areas. The lower branches sweep the ground gracefully and the others incline upward. These inclined branches clothed in fresh green slightly silvery foliage are plume-like in appearance.

The Douglas Fir will withstand dry, windy locations better than any other conifer we could recommend. It is hardy in the high mountains of Canada and the Sierra Nevadas, and is relatively free from disease and insect pests. We invite you to visit Rosedale Nurseries and examine the fine specimens we offer so reasonably.

	Each	10
